

Project Design Phase-I

Solution Architecture

Date	17 October 2022
Team ID	PNT2022TMID48922
Project Name	Project – Personal Assistance for Seniors Who Are Self-Reliant (IOT -Medicine Remainder)
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- ❖ Medicine Reminders serve as good way to stay on track and uphold appropriate schedule.
- ❖ It helps in decreasing medication dispensing errors and wrong dosages.
- ❖ It is used to organize your medication doses for a certain length of time.
